Getting Started with Recon
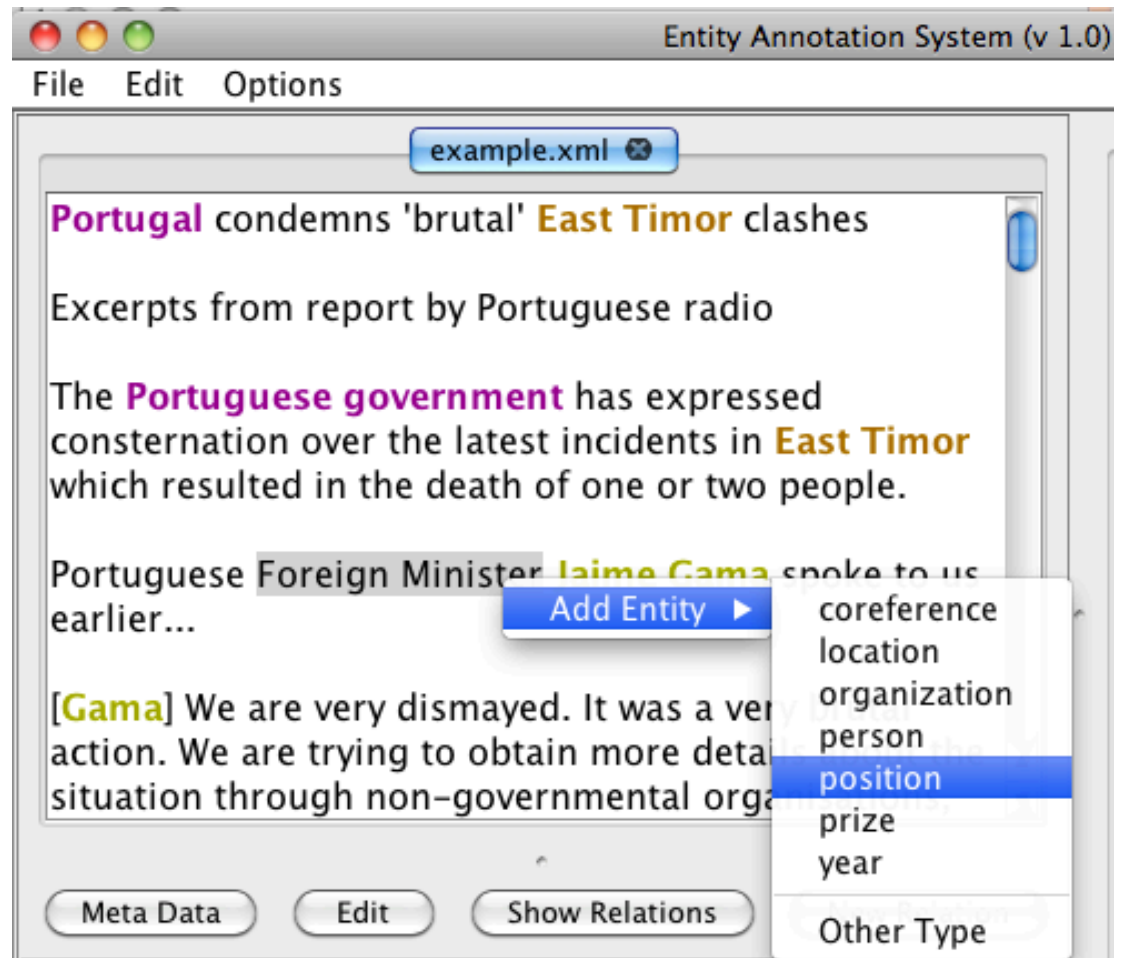

## DFKI GmbH

for Recon Version 2.0 – 4th Mai 2012

Creating Entities

- mark the text
  - word selection: Options → smart select

- click the left mouse button

- select one of types
  - or define a new type with "other Type"

Creating Relations (1)

- click "New Relation"

- select/type the relation name
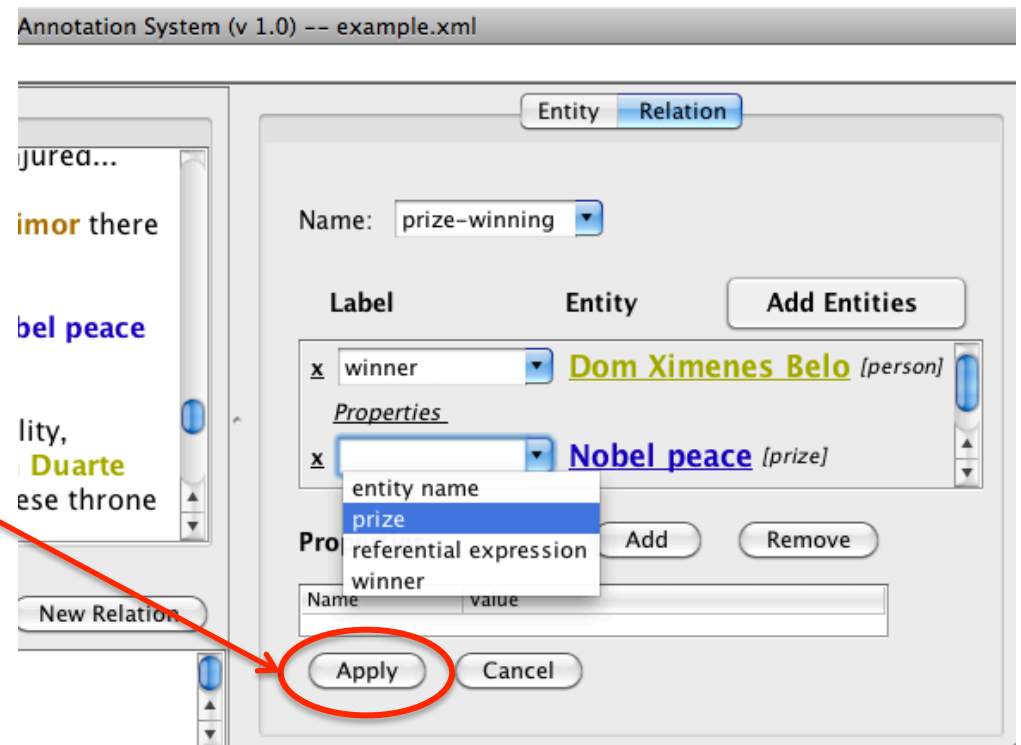

- click "Add Entities"

Creating Relations (2)

- click the entities in the left panel to add relation arguments
- click "OK"

Creating Relations (3)

- select/type the argument label for every argument
- click "Apply"
  - *Attention*! otherwise the annotation about the relation will be lost!

Modifying the Annotation

- right-click the entity
  - select one of the annotated entities, or
  - select one relation

Saving the Annotation

- Menu File→
  Save (Save as)
  - the default output
    format: XML
  - optional export
    format: HTML
